Objective

Software Engineer with hands-on experience in full-stack development, microservices architecture, and cloud-based deployment. Skilled in Spring Boot, Vue.js, and Docker, with proven ability to build scalable web applications and solve real-world problems. Seeking to contribute to high-impact software development projects.

Experience

Department of Information Technology Management (ITMD)

August 2025 – February 2026

Full Stack Software Engineer

- Developed and maintained a full-stack Audit Management System using Vue.js, and Spring Boot
- Designed microservices architecture with Spring Boot and Eureka Server for scalable service communication
- Built RESTful APIs and optimized MySQL databases to support audit workflows and reporting
- Deployed and managed applications on servers, ensuring performance, reliability, and high availability
- Monitored systems and troubleshoot production issues while collaborating in an Agile development environment using Git

Department of Information Technology Management (ITMD)

August 2024 – August 2025

Intern Software Engineer

- Developed and maintained web-based systems including a Cadre Management System and a Guarantee Fund Loan Settlement Monitoring System
- Built full-stack features using PHP, Vue.js, HTML, and Spring Boot for backend and frontend integration
- Designed and optimized MySQL databases for efficient data storage and retrieval
- Implemented RESTful APIs using Spring Boot to support system functionalities
- Managed version control using Git and collaborated with team members through Agile development practices
- Deployed and maintained applications on servers, ensuring system availability and performance

Self Employed

December 2023 – Present

Freelance Software Engineer

- Developed web and mobile applications for multiple clients using React, Node.js, Flutter, React Native, PHP, and ASP.NET
- Designed and implemented scalable backend services using MongoDB and Firebase for real-time data handling
- Deployed and managed applications using AWS, Docker, and Hostinger, ensuring performance and availability
- Collaborated with clients to gather requirements and deliver customized software solutions

Education

Sri Lanka Institute of Information Technology

2026

BSc (Hons) in Information Technology Specialized in Software Engineering

University of Kelaniya, Sri Lanka

2023 - 2026

BSc in Physical Science

Major: Computer Science | Minor: Statistics

Projects

Food Ordering System | Node.js, React, MongoDB, Express, Docker, Kubernetes

- Developed a responsive full-stack food ordering web application using the MERN stack.
- Implemented CRUD operations and REST APIs for order, user, and menu management.
- Containerized the application using Docker and deployed using Kubernetes for scalability.
- Improved system reliability through testing, debugging, and performance optimization.

EV ChargeHub | ASP.NET, React, Kotlin, MongoDB

- Built a role-based web platform to streamline the EV charging experience with dashboards for multiple user roles.
- Implemented real-time station availability and booking management using backend APIs.
- Integrated frontend and backend systems to deliver analytics and data-driven insights.
- Ensured secure data handling and session management across the application

Technical Skills

- Languages: JavaScript, Python, PHP, Java, C#
- Frontend: React, Vue.js, HTML, CSS
- Backend: Node.js, Spring Boot, FastAPI, ASP.NET
- Mobile: Flutter, React Native
- Databases: MySQL, MongoDB, Firebase
- Cloud & DevOps: AWS, Docker, Hostinger
- Tools & Practices: Git, REST APIs, Microservices, Agile, CI/CD
