Professional Summary

Innovative and detail-oriented Software Engineer with 1+ years of experience designing, developing, and deploying high-performance applications. Adept at problem-solving, collaborating in Agile teams, and delivering user-focused solutions. Strong foundation in full-stack development, cloud computing, and software architecture.

Core Competencies

- Full-Stack Development
- REST API & Microservices
- Cloud Platforms
- Agile/Scrum Methodologies
- CI/CD & DevOps
- Problem Solving & Debugging
- Team Collaboration

Technical Skills

Languages: Java, C#, JavaScript, TypeScript, C, C++, PHP, SQL, Kotlin

Frameworks: React, Angular, Node.js, ASP.NET Core, Vue.js, Spring Boot, Express.js, Tailwind CSS

Databases: MySQL, MongoDB, Firebase Firestore

Tools: Git, Docker, Kubernetes, Jenkins, Maven, Gradle

Cloud: AWS, Google Cloud Platform

Testing: JUnit, Selenium, Postman (API Testing)

Education

B.Sc. (Hons) in Information Technology Specialized in Software Engineering

Sri Lanka Institute of Information Technology, Malabe

2022-2026

B.Sc. in Physical Science combined with Computer Science

University of Kelaniya, Sri Lanka

2023-2026

Professional Experience

Intern Software Engineer

Department of Information Technology Management, Sri Lanka | Aug 2024 – Present

- Built responsive web designs for seamless cross-device compatibility.
- Independently developed, tested, and debugged application programs of varying complexity.
- Collaborated with senior developers to implement software using Java Spring Boot, Vue.js, JavaScript, SQL Workbench, and PHP, deploying with Docker and Kubernetes.
- Delivered production-ready code using modern front-end and back-end frameworks.
- Improved website performance through code refactoring and best coding practices.

Freelance Software Engineer

Self-employed | Jan 2024 – Present

- Developing full-stack web and mobile applications, optimizing performance, and delivering client-focused software solutions

Certifications

- Web Design for Beginners (CODL, University of Moratuwa)
- Software Architecture: From Developer to Architect
- Android Development Essential Training
- Describe Cloud Concepts (Microsoft Learn)

Key Projects

- Food Ordering & Delivery Web App – Developed a full-stack food management system using React, Node.js, and MongoDB, containerized with Docker, and deployed with Kubernetes to ensure scalability and reliability.
- Finance Tracking Management System – Engineered a secure backend solution with Spring Boot and MongoDB to manage financial transactions, enabling efficient tracking and reporting.
- EcoAlert Mobile App – Built a cross-platform mobile application with Flutter providing real-time weather forecasting, news updates, and safety location alerts to improve user preparedness.
