PROFESSIONAL SUMMARY

Detail-oriented and results-driven Software Engineer with hands-on experience in full-stack development, microservices architecture, and cloud-based deployment. Proven track record of building scalable web applications and optimizing database workflows using Spring Boot, Vue.js, and Docker. Adept at solving complex engineering problems and delivering high-quality software solutions within Agile environments.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, PHP, Java, C#
- **Frontend:** React, Vue.js, HTML, CSS
- **Backend:** Node.js, Spring Boot, FastAPI, ASP.NET
- **Mobile:** Flutter, React Native
- **Databases:** MySQL, MongoDB, Firebase
- **Cloud & DevOps:** AWS, Docker, Hostinger, Kubernetes
- **Tools & Practices:** Git, REST APIs, Microservices, Agile, CI/CD

PROFESSIONAL EXPERIENCE

Department of Information Technology Management (ITMD), Ministry of Finance, Colombo

Full Stack Software Engineer | *August 2025 – February 2026*

- Developed and maintained a high-performance, full-stack Audit Management System utilizing Vue.js and Spring Boot.
- Designed and implemented a microservices architecture with Spring Boot and Eureka Server, significantly improving service communication and system scalability.
- Built secure RESTful APIs and optimized complex MySQL database queries to support critical audit workflows and real-time reporting.
- Deployed and managed production applications on cloud servers, ensuring maximum performance, reliability, and high availability.
- Monitored live systems, systematically troubleshooted production issues, and collaborated with cross-functional teams in an Agile development environment using Git.

Department of Information Technology Management (ITMD), Ministry of Finance, Colombo

Intern Software Engineer | *August 2024 – August 2025*

- Developed and maintained core web-based platforms, including a Cadre Management System and a Guarantee Fund Loan Settlement Monitoring System.
- Built robust full-stack features using PHP, Vue.js, HTML, and Spring Boot to ensure seamless backend and frontend integration.
- Designed, structured, and optimized MySQL databases to facilitate highly efficient data storage, indexing, and retrieval.
- Implemented clean RESTful APIs using Spring Boot to drive various core system functionalities.

- Managed codebase integrity and version control using Git while actively participating in daily Agile sprints and team practices.
- Deployed and maintained server-side applications, consistently ensuring system availability, stability, and operational performance.

Self Employed

Freelance Software Engineer | *December 2023 – July 2024*

- Engineered customized web and mobile applications for multiple international and local clients using React, Node.js, Flutter, React Native, PHP, and ASP.NET.
- Designed and deployed scalable backend services leveraging MongoDB and Firebase to handle real-time data streaming and synchronization.
- Configured and managed cloud infrastructure using AWS, Docker, and Hostinger to optimize application loading speeds and performance uptime.
- Partnered directly with clients to gather detailed technical requirements, scope project roadmaps, and deliver tailored software solutions.

PROJECTS

Food Ordering System | Node.js, React, MongoDB, Express, Docker, Kubernetes

- Developed a fully responsive, full-stack food ordering web application using the MERN stack.
- Implemented secure CRUD operations and REST APIs for seamless order, user authentication, and menu management modules.
- Containerized the entire application ecosystem using Docker and orchestrated deployment via Kubernetes to ensure seamless horizontal scalability.
- Enhanced overall system reliability through rigorous testing, debugging sessions, and performance optimization bottlenecks.

EV ChargeHub | ASP.NET, React, Kotlin, MongoDB

- Built a secure, role-based web platform designed to streamline the EV charging experience, featuring custom dashboards for multiple user roles.
- Implemented real-time station availability tracking and booking management workflows using asynchronous backend APIs.
- Integrated disparate frontend and backend systems to deliver actionable analytics and data-driven insights to users.
- Ensured robust data handling practices, input validation, and secure session management protocols across the entire application.

EDUCATION

Sri Lanka Institute of Information Technology | June 2026

BSc (Hons) in Information Technology, Specialized in Software Engineering

University of Kelaniya, Sri Lanka | February 2026

BSc in Physical Science

- **Major:** Computer Science | **Minor:** Statistics
