---

## Personal Details

- GitHub : <https://github.com/VihangaU>

---

## Objective

Motivated Associate Software Engineer with a strong foundation in Java, Spring Boot, React, and RESTful API development, seeking to contribute to the design and development of scalable web applications. Passionate about problem-solving, algorithms, and data structures, with hands-on experience in full-stack development, Git version control, and agile environments, and eager to learn modern technologies including cloud computing and DevOps practices.

---

## Experience

- **Department of Information Technology Management, Ministry of Finance, Sri Lanka** August 2025 - Present  
Software Engineer
  - Assisted in the design and development of scalable web applications using HTML5, CSS3, JavaScript, React/Vue.js, ensuring responsive and user-friendly interfaces.
  - Built, integrated, and consumed RESTful APIs using Java and Spring Boot, working with SQL databases to deliver reliable backend functionality.
  - Participated in the full software development lifecycle (SDLC), including testing, debugging, performance optimization, and code refactoring.
  - Collaborated in an Agile team environment, using Git for version control and applying strong problem-solving skills grounded in algorithms and data structures.
- **Department of Information Technology Management, Ministry of Finance, Sri Lanka** August 2024 - August 2025  
Intern Software Engineer
  - Assisted in the design, development, and maintenance of scalable web applications using HTML5, CSS3, JavaScript, and modern UI frameworks, ensuring responsive and cross-browser compatibility.
  - Built and integrated RESTful APIs and backend services using Java and Spring Boot, working with SQL databases to support frontend functionality.
  - Participated in the full software development lifecycle (SDLC), including testing, debugging, troubleshooting, and performance optimization, applying strong problem-solving skills.
  - Collaborated in an Agile/Scrum environment, contributing to code reviews, refactoring, and version control using Git, while learning cloud (AWS) and Docker/CI/CD fundamentals.
- **Self employed** Jan 2024 - Present  
Freelance Software Engineer
  - Developing full-stack web and mobile applications, optimizing performance and delivering client-focused software solutions.
  - Collaborating with clients to gather requirements, provide technical documentation and deliver scalable, maintainable solutions within agreed timelines.

---

## Education

- **Sri Lanka Institute of Information Technology, Malabe** 2026 July  
BSc (Hons) in Information Technology specialized in Software Engineering  
Final year undergraduate
- **University of Kelaniya, Sri Lanka**  
BSc in Physical Science combined with Computer Science

---

## Projects

- **Audit Management System | Spring Boot, Vue.js, SQL**
  - Developed a full-stack web application to manage audits, users, and reports using Spring Boot and Vue.js.
  - Implemented RESTful APIs and integrated them with a responsive front-end interface.
  - Designed and managed relational databases using SQL for secure and consistent data storage.
  - Applied best development practices, including validation, debugging, and performance optimization.
- **Cadre Management System | Vue.js, Spring Boot, Vuex, SQL**
  - Designed and developed a web-based cadre management system with a responsive front-end using Vue.js, ensuring usability across multiple devices and browsers.
  - Implemented state management using Vuex to efficiently handle shared application data and improve front-end scalability and maintainability.
  - Applied modular front-end architecture, code splitting, and clean coding practices to enhance performance and maintainability.
  - Used Git version control and followed structured development workflows for feature implementation and bug fixing.
- **EV ChargeHub | ASP.NET, React, Kotlin, MongoDB**
  - Built a role-based web platform to streamline the EV charging experience with dashboards for multiple user roles.
  - Implemented real-time station availability and booking management using backend APIs.
  - Integrated frontend and backend systems to deliver analytics and data-driven insights.
  - Ensured secure data handling and session management across the application.
- **Food Ordering System | Node.js, React, MongoDB, Express, Docker, Kubernetes**
  - Developed a responsive full-stack food ordering web application using the MERN stack.
  - Implemented CRUD operations and REST APIs for order, user, and menu management.
  - Containerized the application using Docker and deployed using Kubernetes for scalability.
  - Improved system reliability through testing, debugging, and performance optimization.

---

## Technical Skills

- Programming Languages: Java, C#, JavaScript, TypeScript, PHP, SQL, Kotlin, C, C++
- Frameworks & Libraries: React, Angular, Vue.js, Node.js, Express.js, Spring Boot, ASP.NET Core, Tailwind CSS, Vuex
- Databases: MySQL, MongoDB, Firebase Firestore
- Web & API Development: RESTful API Development, Frontend-Backend Integration, Responsive Web Design (HTML5, CSS3)
- DevOps & Tools: Git, Docker, Kubernetes, Jenkins, Maven, Gradle
- Cloud Platforms: AWS, Google Cloud Platform
- Testing & Debugging: JUnit, Selenium, Postman (API Testing)
- Web Fundamentals: HTTP/HTTPS, Session Management & Authentication, Web Application Security Basics

---
